## DEFENSE TECHNOLOGY®

### WE ARE YOUR FORCE OPTION.

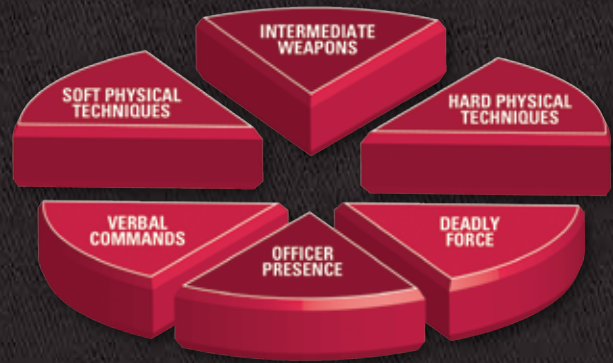

Building on the rich heritage of our Defense Technology® legacy brand, Safariland® offers a complete range of the industry's most trusted less lethal products. Manufactured to exacting specifications and quality standards, the products have led the industry for decades. From duty aerosols and less lethal impact munitions to our Distraction Device® products, chemical munitions and more, Defense Technology products are the choice of law enforcement, corrections and military personnel.

Thanks to their proven performance under the most demanding conditions, our products enjoy a long history of providing the less lethal tools needed to protect life and keep the peace. And we continually advance the frontiers of technology to offer you the world's finest and most comprehensive line of less lethal solutions. With products that are backed up by multiple independent laboratory evaluations, refined with input from leading instructors from throughout the country and used worldwide by leaders in their tactical fields, we offer you the best less lethal solution, backed up by the best training and post incident support in the industry. These are just a few reasons why, Defense Technology® is your force option.

# FORCE ARRAY

There was a time when officers carried only a baton, a gun and maybe a can of Mace®. But the options today are much wider and more complex. To put them in perspective, the Defense Technology® brand has created a circular force array model. The officer is in the center, with all the surrounding force options instantly available for use. This mirrors real-life situations, when lives and safety depend on split-second decisions. The Defense Technology brand solutions fall into three categories: soft physical techniques, hard physical techniques and intermediate weapons. To better convey the proper use of our products in this catalog, we identify each one by its corresponding force array level on the chart in the back of this catalog.

## LESS LETHAL SOLUTIONS

For years, we have carefully studied reports from many departments about the actual use and performance of our products. These categories reflect this experience, matched to the designs and intended uses of our products. With four product categories the Defense Technology brand offers a full range of solutions. To help simplify product selection, this catalog groups our products into the categories represented above by their symbols. When used in combination with the force array designations, this will help make your product selection easier and faster.

**Duty Aerosol**

**First Response**

**Crowd Management**

**Tactical Deployments**

**OUTDOORS** Devices that release agents into the atmosphere by means of compressed pellets and fuel mix, and burn between 200 – 800° F. Primarily used for signaling, communication, crowd control, carrying agent or concealing the movement of personnel. Not to be deployed onto rooftops, in crawl spaces or indoors due to their fire producing capability.

**INDOORS** Devices that eject chemical agents into the atmosphere using various methods i.e. detonators, CO<sup>2</sup> cartridge, primer and powder that have little to no fire hazard. Primarily used indoors and when deployed indoor can be beneficial for locating a suspect.

**INDOORS/OUTDOORS** Devices that eject chemical agents into the atmosphere using various methods i.e. detonators, CO<sup>2</sup> cartridge, primer and powder that have little to no fire hazard. Primarily used indoors, but may be used outdoors. These products deliver enough payload to contaminate an area, and help locate a subject or deny access.

# FIRST DEFENSE® AEROSOL FORMULATIONS

A leading brand among law enforcement agencies, we have expanded our line to encompass the entire range of OC solutions offered by the Defense Technology® brand. With this change, officers can select a First Defense product from a complete line of OC sprays that will specifically address the needs at hand.

In combining the range of OC products, our color-banded packaging system allows operators and procurement alike to instantly differentiate between the intensity level and type of OC required. Offering the classic water based formulation of First Defense and X2, along with the intensity of the oil soluble OC formulas of LE-10 in two different levels means that the First Defense line can meet and exceed field requirements of any enforcement officer.

The percentages on each canister relate to the percent of Major Capsaicinoid (MC %) in each formulation which is a laboratory proven method of validating the intensity of OC formulas. We recommend all consumers refer to this measuring system. While the subjective taste test called Scoville Heat Units (SHUs) has been the industry standard, we believe that using an independent laboratory to confirm the Major Capsaicinoid formula and level is the most objective and defensible way to ensure the quality and consistent application of OC products, time after time. Few brands have the experience and legacy that Defense Technology® brings to the market.

## .2% WHITE BAND

.2% was created from the classic water soluble First Defense® formula. The .2% represents the major capsaicinoid level which is discharged at the nozzle at time of use. This formulation has been tested and is non-flammable and Electronic Discharge Weapon (EDW) safe.

## .4% YELLOW BAND

.4% is equal to the water soluble First Defense® X2 spray. This formulation is the most popular nationwide among patrol officers providing very effective results without compromising the officer. Delivered via a stream pattern. This formulation is also available in an oil soluble cone, and foam delivery system. The 4% is non-flammable and Electronic Discharge Weapon (EDW) safe.

## .7% ORANGE BAND

.7% oil soluble replaces the current 5.5% Pepper Mace® formulation. This formulation is proven non-flammable and Electronic Discharge Weapon (EDW) safe. The 7% is available in stream and cone patterns.

## 1.3% RED BAND

1.3% oil soluble replaces our LE-10 formula stream and cone. Best suited for tactical teams and agencies that require immediate reaction and have decontamination and cross contamination options in place. The 1.3% is non-flammable and Electronic Discharge Weapon (EDW) safe.

## 1.3% BLUE BAND

Defense Technology offers the most intense foam on the market, identified by the blue color band, this product produces a rapid response from the suspect, while minimizing cross contamination effects. The 1.3% major capsaicinoid foam formula is non-flammable and Electronic Discharge Weapon (EDW) safe.

## OC/CS GRAY BAND

This formulation represents the addition of CS to OC which targets the respiratory system. This formula delivers significant intensity, but brings added clean up requirements not found in OC products. Also by adding CS to the formula, an increase risk near an open flame is realized.

## 40 mm DESCRIPTION

As law enforcement gained access to the 40 mm launcher for special needs in the late 80's, technology was focused on enhancing this platform's ability to accurately engage targets at greater distances. The Defense Technology® brand has been the leader in this field from the very beginning. Working in conjunction with the US Army, we have produced the most accurate 40 mm less lethal round. In the less lethal community, the 6325 foam nose less lethal impact round is the standards all others aspire to reach. The Direct Impact® family of payload rounds holds similar accuracy credentials while also delivering a chemical or marking payload on target.

## PRODUCT WARNING!

These products are to be used only by authorized and trained law enforcement, corrections or military personnel. These products may cause serious injury or death to you or others. These products may cause serious damage to property. Handle, store and use with extreme care and caution. Use only as instructed. Additional product information and training is available from the Safariland Training Group. Visit us at [safariland.com/training](http://safariland.com/training) for further details.

# AEROSOLS

First Defense® is the world's most widely used pepper spray in law enforcement and corrections. In recognizing the diverse environments and challenges our public safety professionals face each day, our comprehensive First Defense line utilizes a color code system to identify the intensity of that product. To see these aerosols in-use visit [www.defense-technology.com/videos.aspx](http://www.defense-technology.com/videos.aspx).

## ELECTRICAL DISCHARGE WEAPON (EDW) AND OC

With the growing use of EDW's in the law enforcement community, many officers are concerned about how their OC aerosol spray will react if an EDW is deployed. The First Defense family of OC aerosol sprays are EDW safe.

## STREAM AEROSOL SIZE SPECS

MK-2:	7-10 Short bursts	10-12 ft.
MK-3:	10-12 Short bursts	10-12 ft.
MK-4:	20-25 Short bursts	10-12 ft.

# LESS LETHAL IMPACT MUNITIONS

Whether it's additional crowd routing requirements or targeting instigators, these munitions are designed for a range of effects from pain compliance to delivering maximum energy for incapacitation or disorientation of aggressive subjects. In both 12-gauge and large bore options, less lethal impact munitions offer an effective and dynamic solution. CN products are a special order product; add 30 days to order lead time. To see these less lethal impact munitions in-use visit [www.defense-technology.com/videos.aspx](http://www.defense-technology.com/videos.aspx).

# CHEMICAL

When crowd resistance elevates, our chemical grenades and projectiles offer solutions for both indoor and outdoor situations. Alternatives such as OC, CN, CS, and Smoke provide coverage in pyrotechnic and non-burning carriers. These grenades and munitions offer the maximum force option in the management of crowds and the control of civil and correctional disorder. CN products are a special order product; add 30 days to order lead time. To see these chemical products in-use visit [www.defense-technology.com/videos.aspx](http://www.defense-technology.com/videos.aspx).

## TRIPLE-CHASER®

- Delivers three pyrotechnic sub-munitions
- Minimizes throw back effect
- Launching capabilities utilizing Defense Technology® launching cups
- CN products are a special order product; add 30 days to order lead time

# TACTICAL

These specialized devices and munitions are designed to be deployed by tactical teams during high-risk warrants, hostage rescues and barricaded-subject situations. To see these tactical products in-use visit [www.defense-technology.com/videos.aspx](http://www.defense-technology.com/videos.aspx).

## 8922

Low Roll II™

- 11-Gram Low Roll II™ non-reloadable Distraction Device®
- Produces 175 dB of sound output
- Produces 6 - 8 million candelas for 10 milliseconds
- Utilizes standard military-style fuze
- Smaller profile, superior performance
- Hex design reduces rolling when deployed

8922NRSC Low Roll II non-reloadable w/Safety Clip (Not Shown)

## 8902NR Low Roll™

- Utilizes standard military-style fuze
- Available in a reloadable body and non-reloadable device
- 15-Gram non-reloadable Distraction Device®
- Reloadable unit can be used up to 25 times
- Produces 175 dB of sound output
- Produces 6 - 8 million candelas for 10 milliseconds

8902NRSC Low Roll non-reloadable w/Safety Clip (Not Shown)  
8933 Low Roll Body (Not Shown)

**1697T**

Training Fuze

**NEW**

- Military-style M201A1 fuze
  - Non-ATF controlled item
  - Delivers a 120 dB of sound at 5 feet
  - Color-coded Military training blue
- 1697TSC Training Fuze w/ Safety Clip (Not Shown)

**8933T**

Training Body

**NEW**

- Low Roll™ body only accepts the 1697T or 1697TSC training fuze
- Color-coded Military training blue
- Same weight and function as the tactical Low Roll device

**8901** Distraction Device® Reload

- 15-Gram Distraction Device® Reload
- Produces 175 dB of sound output
- Produces 6 – 8 million candelas for 10 milliseconds
- Utilizes standard military-style fuze

**8901SC** Distraction Device® Reload w/Safety Clip

- 15-Gram Distraction Device® Reload w/Safety Clip
- Produces 175 dB of sound output
- Produces 6 – 8 million candelas for 10 milliseconds
- Utilizes standard military-style fuze
- Safety clip secures pull ring prior to deployment

**7009** Deluxe Cleaning / Maintenance Kit

- Kit includes: nylon utility brush, cleaner handle, small bore brush, 15/16" wrench, large bore brush, tweezers, thread cleaner and Break Free® CLP® cleaner
- Complete cleaning kit for all non Fuel Air™ Distraction Device® units

**7002** DD Body Cleaning Kit

- Kit includes: 15/16" wrench, tweezers and brush
- Simple field expedient cleaning kit

### 1687DT Training Fuze

- 1687DT is a 1-Gram charge used in conjunction with the Distraction Device® bodies w/ brass collars in training environments
- The result is a pop sound when activated
- 1687 is a 1-Gram charge used in conjunction with the Distraction Device® bodies w/ steel collars in training environments
- Both 1687DT and 1687 models are a non ATF controlled product

1687 Training Fuze (Not Shown)

### 7007 Reduced Charge 4-Gram Reload

- Same function with reduced power
- Builds confidence, timing and manipulation skills
- Unlike other training products, there is no confusion when this charge goes off
- Hearing and eye protection still required

7007SC Reduced Charge 4-Gram Reload w/Safety Clip (Not Shown)

### 150944 1000' Thermo Tube

- Thermo tube provides stand-off capabilities

### 7001CI 15-Gram Command Initiated Reload

### 7040 Initiator

### 7023 Splicing Tubes

## COMMAND

### Initiated Reload

- Command Initiated fuze for WallBanger™ or break and rake missions
- Produces 175 dB of sound output
- Produces 6 – 8 million candelas for 10 milliseconds

7030 Staging Spike (Not Shown)  
7020 20' Thermo Tubing (Not Shown)  
7008TC Distraction Device® Body Thread Cleaner (Not Shown)  
8907CI Command Initiated 4-Gram Reload (Not Shown)  
8908CI Command Initiated 8-Gram Reload (Not Shown)

**WALLBANGER SHOWN ABOVE WITH REMOTE DOORKEY SYSTEM.**

### 1005 WallBanger™ Breaching Tool (Shown)

- A multi-mission tool that breaches secured areas
- Conduct "break and rake" mission while safely deploying a Distraction Device® unit
- Introduce OC from more than 15 feet away
- Breach locked doorways
- Cut fighting port through interior walls

#### KITS

- 1005 Premium WallBanger™ System
- 1006 Bang-N-Breach System
- 1008 Standard Double WallBanger Bang Pole Kit
- 1009 Deluxe Double WallBanger Bang Pole Kit
- 1010 Remote DoorKey™ System

#### COMPONENTS

- 1002 Double WallBanger
- 1003 OC Blaster
- 1004 DoorKey™
- 1012 DoorKey w/ Bracing System
- 1013 Electronic Ignition System
- 1014 Carrying Case

#### POLES

- 100768 66" Carbon Steel Pole
- 100868 66" Aluminum Pole
- 100738 38" Carbon Steel Pole

#### EXTENSIONS

- 100803 3' Aluminum Extension
- 100708 1' Aluminum Extension
- 100801 Carbon Steel Extension

#### HANDLES

- 100711 Wheel Grip Handle
- 100712 Pen Grip Handle

#### ACCESSORIES

- 100710 3-Pronged Head
- 100900 MK-9 Clip - 18" hose for OC Blaster
- 100901 Push Button Pin Gun
- 100902 Safety Clips (2)
- 100903 Round Hitch Pin
- 100904 Breaching Log Book
- 100905 Custom Canvas Pole Bag
- 100906 Custom Canvas Implement Bag

#### LESS LETHAL

### 3105 TK0 12-Gauge Breaching Round

- Disintegrates on contact
- Instantly delivers full energy to door / lock as it turns to dust
- Safe to use at close distances

# LAUNCHERS

Renowned for its smooth single action and reliability, the Defense Technology® launchers are a recognized platform in the less lethal arena. Whether for crowd management, tactical deployment, or first responders, this family of launchers provides accuracy, quality and value.

## 1325

40 mm Launcher

- Open top, single shot, breech fed system
- Offers a single and double action trigger
- 40 mm rifled barrel enhances the superb accuracy of the munitions
- Picatinny rail and ghost ring sighting system

## 1315 37 mm Full Stock Gas Launcher

- Offers a single and double action trigger
- Smooth bore
- Fixed front and rear leaf sights
- Full stock with integrated pistol grip

## LESS LETHAL

## 6029WS

40 mm Aerial Warning/Signaling Munitions, 100 Meters

- Delivers a sound and light which are noticeable in day or night conditions
- Low light range indicator
- 40 mm munitions

6030WS 40 mm Aerial Warning/Signaling Munitions, 200 meters (Not Shown)

6031WS 40 mm Aerial Warning/Signaling Munitions, 300 meters (Not Shown)

### 1303 Less Lethal Weapon Cleaning System 37/40 mm Heavy Duty 100% Cotton Bore Mop

- Removes contaminants quickly
- Used after bore brush
- Important in removing black powder fouling and protecting the rifling
- Refill item for cleaning kit

### 1304 Less Lethal Weapon Cleaning System 37/40 mm Heavy Duty Phosphor Bore Brush

- Designed to protect the bore, while removing contaminants
- Important in removing black powder fouling and protecting the rifling
- Refill item for cleaning kit

### 1305 Less Lethal Weapon Cleaning System 12-Gauge, 37/40 mm

- Complete cleaning kit for less lethal platforms
- Using the trusted KleenBore® components
- Key refill items are listed in kit

# MILITARY

The Defense Technology® brand continues to deliver reliable and effective tools to meet the challenges of asymmetrical warfare. From our military sponsored 40 mm eXact iImpact™ round, to our smoke devices and 12-gauge less lethal impact rounds, our products are manufactured to exacting specifications and quality standards.

## M1013/3020M

12-Gauge NL Crowd Dispersal Cartridge

- Direct fire, short range 12-gauge round
- Obtain compliance from a safe distance
- Specifically developed for routing, protecting chemical devices

NSN# 1305-01-470-2139

## XM1116/3028M

12-Gauge NL Extended Range Drag Stabilized™, Marking Cartridge

- Highly accurate regardless of heat or cold conditions.
- Designed for location with pre-set stand-off distances
- Drag Stabilized™ round delivers impressive energy at all effective ranges

NSN# 1305-01-536-1520

## M1012/3021M

12-Gauge NL Point Control Cartridge

- Direct fire, short range 12-gauge round
- Fin stabilized accuracy
- Specifically developed for routing, protecting chemical devices or targeting instigators

NSN# 1305-01-470-2405

## M1029/6095M

40 mm NL Crowd Dispersal Cartridge

- The custom 48 cal. rubber balls have increased weight and mass
- Direct / indirect fire munitions delivers massive pain compliance

NSN# 1310-01-475-0628

## XM104/1090M

Stinger® Rubber Ball Grenade

- An area deployment device
- Maximum stimulus overload via, light, sound, and impact delivery

## XM1091/6326M

40 mm NL Extended Range Marking Cartridge

- Direct fire munitions with payload options
- Unmatched accuracy out to 100 meters
- Crushing nose dampens blunt trauma while delivering payload

NSN# 1310-01-536-1536

## LESS LETHAL

## 6530M

### 40 mm Reloadable Training Round

- Extremely accurate direct fire training round
- Conduct manipulation drills, hold certification at a fraction of the cost
- Reloading the munitions takes seconds and one hex key
- For use on inanimate targets
- Shipped in 250-shot kits
- Indoor / outdoor deployment (follow distance guidelines)

PATENT PENDING

### 1088 Stinger® Rubber Ball Grenade - CS

- An area deployment device
- Maximum stimulus overload via, light, sound, impact and agent delivery
- Launcher deliverable device
- Indoor / outdoor deployable

### 1089 Stinger® Rubber Ball Grenade - OC

- An area deployment device
- Maximum stimulus overload via, light, sound, impact and agent delivery
- Launcher deliverable device
- Delivers OC agent instantly
- Indoor / outdoor deployable

### 1032 Flameless Tri-Chamber Grenade - CS

- This is a contained pyrotechnic grenade
- Delivers enormous smoke and agent payload, without concern of starting a fire
- Can be used indoors when significant amounts of agent are required
- Outer container gets hot; yet no flame leaves body
- Indoor / outdoor deployment

### 1082 Riot Control Grenade - CS

- High volume pyrotechnic grenades
- Delivers large plumes of smoke and agent
- Utilizes standard fuze
- Launching capabilities utilizing Defense Technology® launching cups
- Outdoor deployment

### 1083 HC Military-Style Max Smoke Grenade

- High volume pyrotechnic grenades
- Delivers large plumes of smoke and agent
- Utilizes standard fuze
- Launching capabilities utilizing Defense Technology® launching cups
- Military-style canister
- Outdoor deployment

Deployments

There was a time when officers carried only a baton, a gun and maybe a can of Mace®. But the options today are much wider and more complex. To put them in perspective, Defense Technology has created a circular force array model. The officer is in the center, with all the surrounding force options instantly available for use. This mirrors real-life situations, when lives and safety depend on split-second decisions. The Defense Technology brand solutions fall into three categories: soft physical techniques, hard physical techniques and intermediate weapons.
